ABOUT TXA

The Texas Society of Architects (TxA) is a state component of the American Institute of Architects (AIA). Founded in 1939, we are one of the nation's largest organizations of architectural professionals, with 17 regional chapters and more than 7,000 members. Our mission is to be the voice for Texas architecture, supporting the creation of safe, beautiful, sustainable environments.

Representing more than 12 percent of the AIA National membership, TxA continues to be one of the largest and strongest state components.

WHY A VIRTUAL CONFERENCE?

COVID-19 has changed the way we live, interact, and meet. Our main priority is the safety and well-being of our members, supplier partners, and staff. For this reason, we have proactively made the decision to re-imagine this year's Annual Conference + Design Expo into a dynamic, interactive, virtual experience. The spirit of our Annual Conference will remain intact as we continue to offer outstanding keynotes, timely breakout sessions, informative tours, engaging networking opportunities, and a fully-interactive exhibit experience.

WHY BECOME A TXA SPONSOR?

We are committed to supporting you with the same level of quality, attention and diligence to which you are accustomed. We are excited to expand industry engagement, offering new and innovative ways for architects to share best practices, discuss new products and services, and immerse themselves in current architectural trends through our interactive virtual platform.

In 2020, TxA sponsors will experience the following (and much more):

- » Greater visibility and opportunities to connect with attendees through our digital exhibit hall
- » Meaningful conversations through online chat features, forums, Q&As, and participation in live sessions
- » Customized prerecorded presentations, video demonstrations, and recent case studies, all featuring your organization
- » Increased lead time with your content living on for an additional six months on the TxA conference platform
- » State-of-the-art analytics and lead capture data
